

the broadband speed you need

19<sup>th</sup> November 2020

## **toob is bringing full-fibre hyperspeed broadband to a further 200,000 homes and businesses across Hampshire and Surrey**

- toob will roll out its full-fibre network to an additional 200,000 premises across 10 towns in Hampshire and Surrey
- Residents and businesses will benefit from the increased speed and reliability of full-fibre networks
- toob's broadband delivers speeds of 900 Mbps on both download and upload at a very accessible price of £25 per month

toob has been rolling out its full-fibre network and connecting customers to hyperspeed broadband in Southampton since the end of 2019. With the network roll-out progressing well, toob has identified the next towns where it will be deploying its network.

toob has commenced detailed planning across 10 towns in Hampshire and Surrey. These include Camberley, Farnborough and Guildford. Build activity is due to start in Spring 2021 with first customers connected by Summer 2021.

toob is providing individuals, families and businesses with access to the increased speeds and reliability of full-fibre networks. toob customers receive over 900 Mbps download and upload speeds for a price of £25 per month for 18 months. This is £16 less than the average monthly consumer bill including line rental, which is not required with toob broadband (source: Ofcom, Review of pricing practices in fixed broadband, 2019). Hundreds of customers in Southampton are already benefiting from these speeds and the increased reliability full-fibre delivers.

toob customer, and psychologist Phine Dahle, said: "Like many people, lockdown forced me into remote working and I needed to be able to carry out client sessions using video conference. As my work is quite often sensitive and certainly confidential, I needed to be able to carry on my day to day as uninterrupted as possible. A strong and fast broadband connection was crucial and thanks to toob, I have been able to do that."

Nick Parbutt, CEO and Founder of toob, said: “We have always viewed the deployment of full-fibre networks as an economic and social necessity and the current challenges we are facing only reinforces this belief. With the announcement of our next locations, I am delighted that we can bring the benefits of hyperspeed broadband to more families, business and communities.”

toob will deploy its network to Aldershot, Ash, Camberley, Farnborough, Frimley, Frimley Green, Guildford, Mytchett, West Byfleet and Woking.

### **Notes to editor**

Launched in 2019, toob is a full-fibre broadband provider on a mission to transform the South of England’s internet experience. toob has a bold plan to deploy its network to more than a million premises over the next 10 years.

Founded by an experienced team from some of the world’s biggest telecommunications brands, toob offers simple, affordable access to its full-fibre network so everyone in the community can benefit from hyperspeed broadband, regardless of income, technical knowledge or age.

toob seeks to play an active role in the communities it operates in and has recently been announced as the first Premier Partner for Southampton’s UK City of Culture bid for 2025.
